#### **Antarctica meltdown could double sea level rise**

Researchers at Pennsylvania State University have been considering how quickly a glacial ice melt in Antarctica would raise sea levels. By updating models with new discoveries and comparing them with past sea-level rise events they predict that a melting Antarctica could raise oceans by more than 3 feet by the end of the century if greenhouse gas emissions continued unabated, roughly doubling previous total sea-level rise estimates. Rising seas could put many of the world's coastlines underwater or at risk of flooding and storm surges.

## Trending

Today's most popular articles that are being shared, liked and talked about online. Altmetric tracks article citations, shares on social platforms, mentions in blogs and news outlets.

## Search

Finding the right information on nature.com is easy and intuitive

Searches can be made more specific using the "advanced" search option. See next slide for more details

Search boxes appear in the top right corner of all journal pages.

The screenshot shows the top navigation bar of the nature.com website. On the left, there is a 'Menu' dropdown button and the 'nature' logo. On the right, there are links for 'Subscribe', 'Search' (with a magnifying glass icon), and 'Login' (with a user icon). Below the navigation bar, the 'Article Search' section is highlighted with a yellow border. It contains a search input field with the placeholder text 'Search by keywords or author' and a 'Search' button. Below the search input, there is a link for 'Advanced search'. At the bottom of the highlighted area, there is a 'Quick links' section with four links: 'Explore articles by subject', 'Find a job', 'Guide to authors', and 'Editorial policies'. Two callout boxes are present: one on the left pointing to the 'Advanced search' link, and one on the right pointing to the 'Search' link in the navigation bar.

The screenshot shows the top of a Springer Nature article page. The header is orange with the 'nature food' logo and a 'MENU' dropdown. Below the header is a dark blue banner with a search bar and icons for 'Search', 'E-alert', 'Submit', and 'My Account'. A blue bar below the banner contains the text: 'Help us understand how you use our websites. [Take part in our 30 minute study now.](#)'

The article title is 'Consumer acceptance of novel food technologies', published on 17 June 2020. The authors are Michael Siegrist and Christina Hartmann. The article is from 'Nature Food', volume 1, pages 343-350 (2020). It has 1510 accesses and 35 Altmetric mentions. A 'Download PDF' button is visible on the right side of the page.

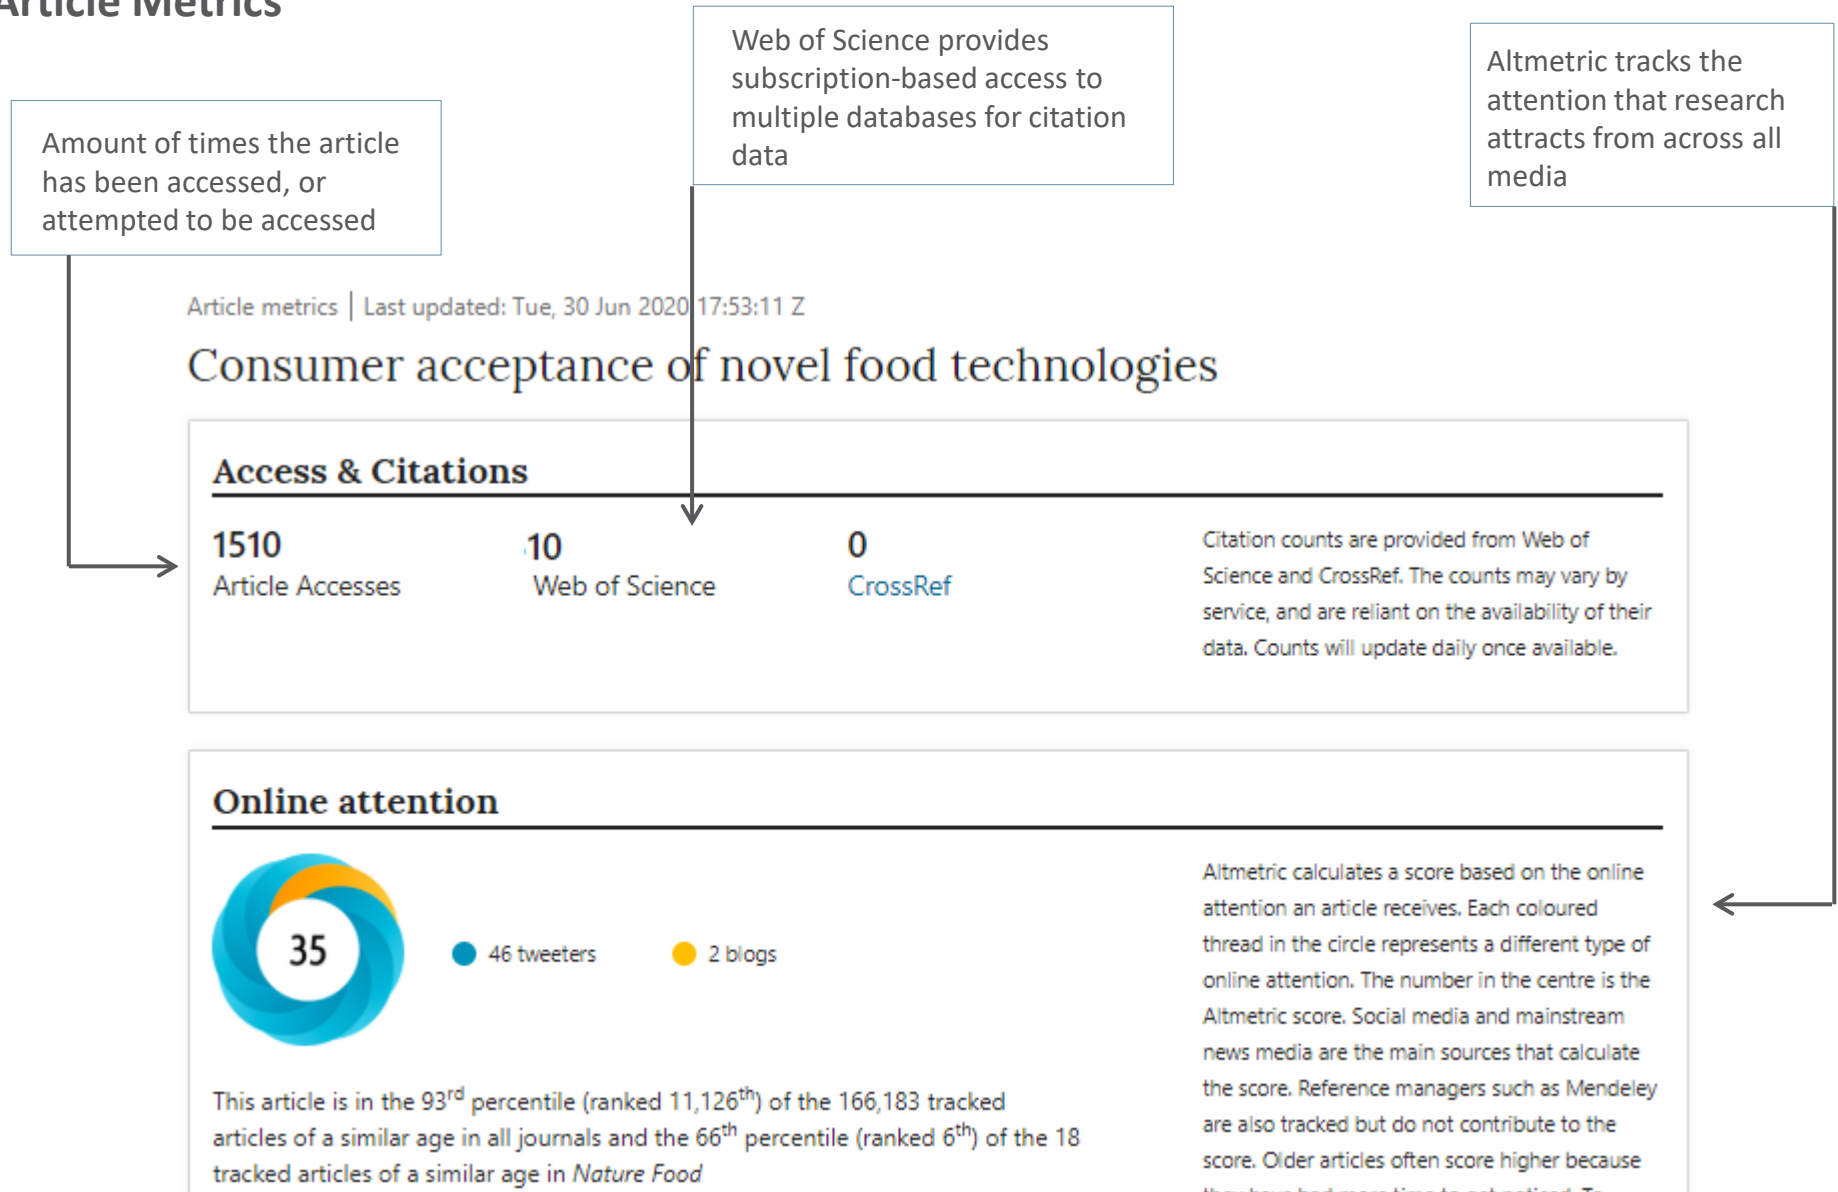

On the right side, there is a 'Sections' menu with tabs for 'Sections', 'Figures', and 'References'. The 'Sections' menu is expanded, showing a list of sections: Abstract, Main, Perception of food technologies, Role of heuristics, Framing effects, Individual differences among people, Acceptance of selected food technologies, Gene technology, Nanotechnology, Cultured meat, and Food irradiation.

Callout boxes with arrows point to various elements: 'Article metrics (see next slide)' points to the metrics section; 'Author(s) & Research Institution details' points to the authors' names; 'Use the article offline by downloading a PDF version' points to the 'Download PDF' button; and 'Navigate the article by scrolling down or jump to the desired section via these links' points to the 'Sections' menu.

**Abstract**

Novel food technologies are important for food security, safety and sustainability. Consumers, however, are often hesitant to accept them. In this narrative Review, we organize the research describing how heuristics and individual differences among consumers influence the acceptance of agri-food technologies. Associations evoked by a food
